Dear Madam or Sir,

A new year has begun, and we remain true to our values and aim to develop them even further. One of our most important principles is our quality, for this reason, we have spared no expense and effort in recent years to equip our in-house laboratory with the latest measuring equipment.

Find out more about our quality control and much more in our latest newsletter!

Have fun reading!

Oliver Schöttle and the entire Team of SM Motorenteile GmbH

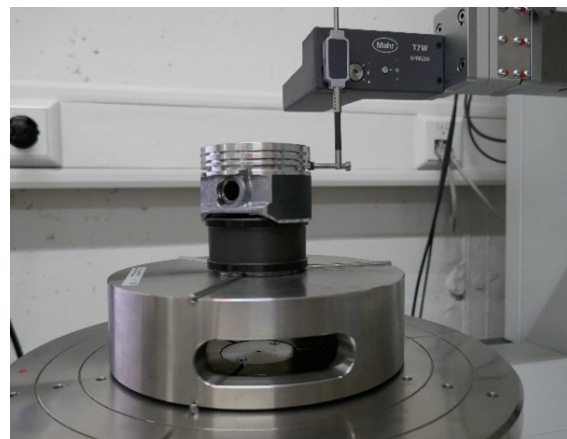

info@sm-original-germany.com

MAIN TOPIC

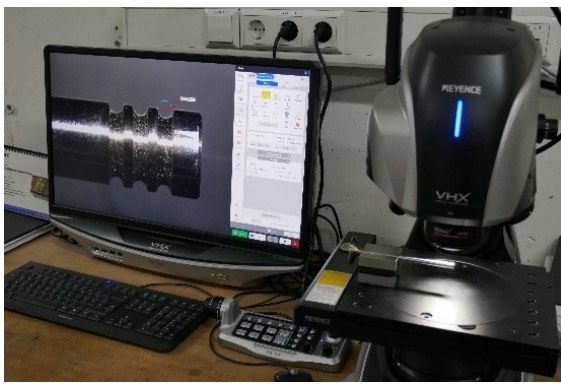

QUALITY is our top priority!

Quality that meets our customers highest standards and matches their engine specifications has been one of our guiding principles since the company was founded.

With our computer-controlled incoming goods inspection, all inbound goods are analysed once again according to predefined criteria before they are finally delivered to our customers. With the most modern measuring equipment from leading manufacturers, we are able to master increasingly difficult measuring tasks.

Whether form-testing the modern piston pin bore, carrying out exact microscopic analyses, or hardness testing DLC-coated components by means of a micro-hardness-tester, all relevant characteristics of our products are measured.

Our internal laboratory capacity, complemented by extensive documentation of the measurement results, ensures complete traceability of our products quality allowing us to offer you reliable and consistently high quality.

NEW RELEASES

New developments in SM Motorenteile

To keep up to date with the latest technologies and supply our global markets in the best possible way, we are constantly expanding our product portfolio through new developments.

We are currently developing new engine parts such as piston rings, pistons, cylinder liners and assemblies, valve train parts and engine bearings. Now available for pre-order.

Do you still know me?

VW buses of the T4 and T5 series are becoming real classics. Whether used as a towing vehicle for trailers or campers - many enthusiasts prefer the smooth running and flexibility of the 2.5TDI 5-cylinder in-line engines such as AXD or AXE. We have the cylinder head [485021-1](#) in our program, but also the older 4-cylinder 1.9D for T4, like ABL or 1X in stock.

Contact us, we look forward to hearing from you!

Do you already know me?

The Renault H4B 3-cylinder 0.9 liter and H5F 4-cylinder 1.2 liter engines are installed in many vehicles such as Dacia Duster, Mercedes-Benz Citan, Nissan Qashqai, Renault Clio & Kangoo, as well as Smart. SM now offers connecting rod bearing and main bearing sets [433831](#) and [403829](#) for these engines, available in STD and up to 0.75 mm oversize.

INSIDE SM

10th anniversary: Ms. Katia Perez Moya

Since 2013, Ms. Perez Moya has been a valuable member of our manufacturing and packaging team. Whether assembling ring sets or packing valves and valve guides, she is always there with speed and precision.

We thank Ms. Perez Moya for her tireless commitment and look forward to continued good cooperation.

Saber Certificate

We are pleased to inform you that we have received our Saber certificate for export to Saudi Arabia for the year 2023. This means our Saudi Arabian customers can continue to import SM products without any problems.

To support the earthquake victims in Turkey and Syria, we donated via Aktion Deutschland Hilft e.V. to make our small contribution to ensuring that the people who have faced this tragedy do not lose hope.

TERMINE

[Automechanika in Astana](#), Kazakhstan from 12. – 14.04.2023

[Automec in São Paulo](#), Brasil from 25. – 29.04.2023

[Automechanika in Istanbul](#), Turkey from 8. – 11.06.2023

We will be available at all three trade shows. Please contact your respective area sales manager for an appointment.
