

[HOME](#) | [CATALOGUES](#) | [CONTACT](#)

Dear Madam or Sir,

It is very important to us that you can always be sure of the authenticity of our products, which is why we are continuously developing our security features.

Information about our modified hologram label, the renewal of our ISO certificate, and many other interesting topics can be found in our current newsletter.

Have fun reading!

Oliver Schöttle and the entire Team of SM Motorenteile GmbH

info@sm-original-germany.com

MAIN TOPIC

New features on our hologram labels

Attractive brands always magically attract counterfeiters. To assure that you have purchased an original SM product in the future, we have equipped our product labels with new state of the art features that make it impossible to counterfeit our labels.

With the new hologram labels, we have improved important visible and invisible security functions and added new features. An overview of the old and new properties of our labels can be found [here](#). You can still use the QR code shown on the label to check whether you have purchased an original SM product, simply scan the QR code using your mobile phone or enter the 16-digit code on our [homepage](#).

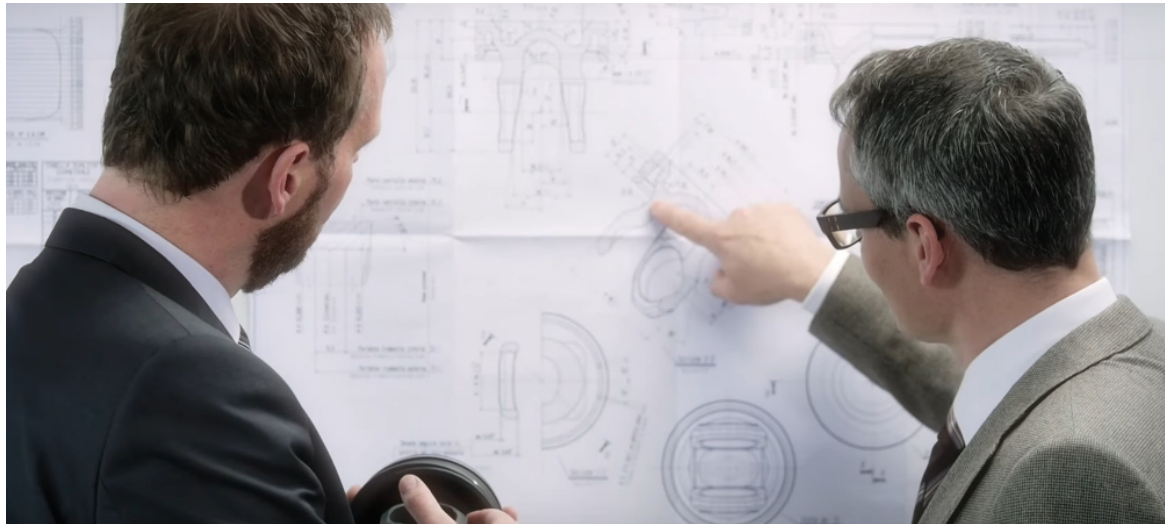

The labels will be changed gradually, so there may be overlaps in the coming months. However, this has no influence on the authenticity check. The fact that you can always be sure that you have an original product is our top priority, regardless of whether it is an old or new hologram label!

On May 15th, it was that time again, the auditors from TÜV SÜD were on site for what is now our 13th surveillance audit.

During this one-day audit, the conformity of our quality management system to the norm was confirmed without any deviation. The very structured work processes in our warehouse were explicitly highlighted and praised. This very good result ensures that in the future we will continue to supply the usual high-quality service and products that you are used to.

NEW RELEASES

New developments in SM Motorenteile

To keep up to date with the latest technologies and supply our global markets in the best possible way, we are constantly expanding our product portfolio through new developments.

We are currently developing new engine parts such as piston rings, pistons, cylinder liners and assemblies, valve train parts and engine bearings. Now available for pre-order.

Piston Rings / Pistons / Cylinder Liners and Assemblies

Do you still know me?

Since 2011, the "new" Mercedes Actros has been available with the 6-cylinder in-line engine OM471 Euro 5 / Euro 6. For some time now, we have had the valves available for this engine. Contact us for inlet valve [851075-6](#) and exhaust valve [861076-6](#)!

Do you already know me?

The small, powerful 1.2 TCe engine from Renault is used in many vehicles. For example, it is found in the Dacia Duster, Renault Clio, and Mercedes Benz Citan under the designation M200. To complement the piston-ring and bearing sets, we now also supply the piston under part number [803851-00-1](#) in standard size diameter 72.20 mm and [803851-50-1](#) for oversize 0.50 mm

We look forward to your order!

INSIDE SM

10th anniversary: Mr. Peter Zlamal

Mr. Peter Zlamal joined our company as a concierge in 2013. Whether repairs, errands, or kitchen service during our trade fairs, Mr. Zlamal has become an integral part of the SM family. We are delighted that he continues to assist us on a regular basis during his retirement.

Thank you for your valuable support.

Reinforcement in the sales team: Mr. Marc Bauer

Since November last year, we have been able to gain a new member to the SM family, Mr. Bauer is our new Area Sales Manager for Middle East. After 12 years in procurement management and with more than 17 years of sales experience as a key account manager in an international environment, Mr. Bauer is an enrichment for our team. We extend our warmest welcome and look forward to a good cooperation.

Fire protection assistant training

At the beginning of May 2023, the time had come once again. Twelve volunteers from our warehouse and offices completed a course to become fire protection assistants on the SM company premises.

Under the precise instructions of the Fire Extinguisher Centre of Freiberg am Neckar, the prospective fire protection assistants learned everything about how fires start, how they can be prevented and which extinguishing agents are to be used to fight the respective fires. The dangers of fires and the correct procedures to follow in case of an emergency were also part of the one-day workshop.

After the theoretical part, all employees were then allowed to put their knowledge to the test at a practice station to handle such an emergency. Each fire protection assistant was allowed to put out an artificially triggered fire to consolidate the handling of the different fire extinguishers and extinguishing tactics.

We would like to thank Mr. Förtsch from the fire extinguisher centre for the eventful experience!

OUTSIDE SM

Automec Brazil

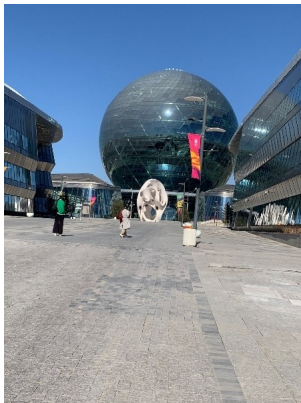

This year we participated as visitors during the Automec Sao Paulo, as opposed to 2019 where we had a booth. We were surprised by the crowds of people who, apart from the stands and lectures at the fair, were also able to experience a wild drift racing show in the outdoor area.

Fortunately, we were able to meet many of our Latin American business partners and some promising contacts during the fair with whom we shared interesting conversations.

We would like to thank all our business partners and especially our representatives in South America who assisted and supported us during the fair.

Automechanika and Komtrans Astana

From 12th to 14th of April 2023, after the long pandemic break, the long-awaited Automechanika Astana was held at the EXPO grounds in conjunction with Komtrans Astana.

210 exhibitors from 14 countries as well as 10,471 visitors attended both fairs during the three-day event, many of whom came directly from Kazakhstan.

Numerous customer meetings, exciting interviews and a lively exchange of experiences gave the fair an international character and put all participants in a typical fair atmosphere.

The SM team was on site as visitors to meet with partners and find out more about upcoming trends.

We thank our partners for their support and interesting discussions!

IMPORTANT DATES

automechanika
DUBAI

[Automechanika Dubai 2.-4. October 2023](#)

Once again, we look forward to welcoming you to our stand at the Automechanika Dubai 2023. More information on this will be provided soon, nonetheless, you can already contact your corresponding area sales manager to make an appointment. We look forward to meeting you there!

Opening hours

As always, we are open for you throughout the entire summer.
